Subject: Re: Final PCB Source Tracing Report

Dear Jenee,

Thanks for including me in the process of generating to valuable piece of work. Once it is completed and published, I will be proving the web link to the Bay Area community and encouraging them to take a close look since the information it describes sets a very nice precedent for what can be done to find and plan to abate PCBs, a very challenging and expensive environmental problem.

Please do send the link when it's ready.

Regards
Lester

Thanks, Jenee, for providing a copy of this report. It is an excellent, comprehensive, report and will be very helpful to my agency as we look for additional approaches to tracking down sources of PCB's in our watershed.

Thanks again,
Andy Kricun
